

Staying connected means staying productive with TELUS Mobile VPN Plus.

<p>What it is?</p>	<p>TELUS Mobile VPN Plus allows mobile workers with the ability to stay in continuous and secure access to back-end or “behind-the-firewall” applications across multiple wireless and wireline networks when using a laptop with a TELUS wireless Connect Card or Windows Mobile Smartphones. Users can start their day securely connecting to your organizations applications, and then they can move across multiple networks – all without ever closing applications or re-logging in. TELUS Mobile VPN Plus maintains a secure, reliable connection to enterprise applications to keep you, your employees, and your organization productive.</p>
<p>Why it's great?</p>	<p>No up-front investment needed. TELUS Mobile VPN Plus is charged to customers as a monthly service fee.</p> <ul style="list-style-type: none"> ▪ More powerful alternative to standard VPN solutions ▪ Searches out the fastest available network and connects with the one with the most available bandwidth for optimal performance. ▪ A highly scalable software based mobile VPN solution ▪ Provides data compression in order to increase speed and reliability. ▪ Maintains session persistence to your organization’s secure applications as workers move between any wireless or wireline network connection without closing your application or having to re-log in to your VPN. ▪ Automatically manages connection for you – time saved by eliminating VPN and application session disconnects & reconnects ▪ Security – limits access based on preferred network and corporate policies ▪ Provides a centralized, web-based console for technology administrators for a complete system-wide view, from overall metrics down to device connections, workers’ behaviour and application use. ▪ Easy installation – low cost to deploy and maintain <p>Pay for what you need:</p> <ul style="list-style-type: none"> ▪ Add subscribers as business grows ▪ Receive one TELUS bill for your TELUS wireless service and TELUS Mobile VPN Plus service ▪ Allows companies to avoid capital expenditures and yearly maintenance fees by paying monthly per user.
<p>How much does it cost?</p>	<p>There is no minimum commitment to activate TELUS Mobile VPN Plus.</p> <ul style="list-style-type: none"> ▪ Total cost per subscription is \$17 per month. ▪ Cost includes \$12 for TELUS Mobile VPN Plus service and \$5 for TELUS’ Premium Service and Support.

Who it's ideal for?	<p>The target audience for this business application is any organization that has Field Service employees or mobile team members.</p> <ul style="list-style-type: none"> ▪ The client either wants to stay connected all day or would connect at least 3 times per day. ▪ Client uses TELUS wireless Connect Cards, and/or TELUS Windows Mobile Smartphones. ▪ The client uses at least one mission critical application.
User Scenarios.	<p>Session Persistence.</p> <ul style="list-style-type: none"> ▪ Problem: When field workers move out of cell coverage, their VPN tunnel is dropped and they are logged out of any online applications. ▪ Solution: TELUS Mobile VPN Plus service allows a client to return to their applications exactly where they left off. The VPN tunnel automatically reconnects once they are within EVDO coverage again. This saves the client the hassle of logging into their VPN and applications multiple times throughout the day. <p>Moving between Networks.</p> <ul style="list-style-type: none"> ▪ Problem: Field workers are constantly moving between networks. A client may start in the office on the LAN, then head out on the road where they then connect with their air card or to Wi-Fi. Without TELUS Mobile VPN Plus, each of these network changes would drop/close all applications, which would then require the user to have to re-authenticate and re-log into their applications each time. ▪ Solution: With TELUS Mobile VPN Plus service clients can simply wait a few seconds as the application changes networks, and carry on with their work since all their applications remain open, and the VPN tunnel and encryption is continually maintained. Connect to your organization's secure applications from anywhere within the coverage area, switch to a Wi-Fi hotspot, or even travel across the country to later reconnect to the TELUS EVDO network – pick up right where you left off - all without ever closing your applications or re-logging in to your VPN.
Why choose TELUS?	<ul style="list-style-type: none"> ▪ TELUS is the first carrier in Canada to offer a packaged VPN service that is built specifically for mobile workers and charged to customers as a monthly service fee on their Wireless bill. ▪ TELUS offers a complimentary 30-day Evaluation Program with hands-on consulting for an exceptional customer experience.
